Ankle(s)

Critical Indicators of Ankle Injuries

Keywords and Phrases:

- "Ankle pain"
- "Twisted ankle"
- "Rolled ankle"
- "Ankle sprain"
- "Ankle fracture"
- "Swollen ankle"
- "Bruised ankle"
- "Injured ankle"
- "Ankle instability"

Contextual Indicators:

- Incidents where the worker describes twisting or rolling their ankle.
- Situations where the worker reports falling, tripping, or being struck in the ankle.
- Descriptions of immediate pain, swelling, or bruising in the ankle area following an incident.

Example 1: "I tripped on a loose cable and twisted my ankle, which is now swollen and painful."

- **Injury Body Part:** Ankle(s)
- **Why this label?** Because the text explicitly mentions "twisted my ankle".

Example 2: "A heavy box fell on my foot, injuring my ankle and making it difficult to walk."

- **Injury Body Part:** Ankle(s)
 - **Why this label?** Because the incident involves a heavy object impacting the ankle, causing injury and difficulty walking, which are associated with ankle injuries.
-

Foot (Feet), Except Toe(s), Unspecified

Critical Indicators of Foot Injuries (Except Toes)

IMPORTANT: Any mention of foot pain, injury, or conditions affecting the foot (excluding toes) should be classified under "Foot (Feet), Except Toe(s), Unspecified". These indicators point to injuries or conditions affecting the foot's bones, ligaments, or soft tissues.

Keywords and Phrases:

- "Foot pain"
- "Injured foot"
- "Foot fracture"
- "Foot sprain"
- "Swollen foot"
- "Bruised foot"
- "Foot strain"
- "Foot injury"
- "Foot discomfort"

Contextual Indicators:

- Incidents where the worker describes direct trauma to the foot (excluding toes).
- Situations where the worker reports stepping on something sharp, dropping heavy objects on their foot, or similar incidents.
- Descriptions of immediate pain, swelling, or bruising in the foot area following an incident.

Example 1: "I was on the driveway, delivering a package. After placing the parcel on the ground, I started heading back to my vehicle. While walking down the steps, I slipped on some unnoticed ice. My foot twisted as I tried to catch myself from falling. About an hour and a half later, my foot began to swell and throb. I had to call my company and inform them that I couldn't continue working."

- **Injury Body Part:** Foot (Feet), Except Toe(s), Unspecified
- **Why this label and not Ankle(s)?** Because the individual repeatedly refers to their foot, not their ankle, which suggests they are identifying the location of the injury as the foot. Besides, the exact location is not specified.

Example 2: "I stepped on a sharp object that went through my shoe and injured my foot."

- **Injury Body Part:** Foot (Feet), Except Toe(s), Unspecified
- **Why this label?** Because the incident involves a sharp object penetrating the shoe and injuring the foot, excluding toes, which are associated with foot injuries. However, the exact location is not specified, hence, Foot (Feet), Except Toe(s), Unspecified.
